

Amendments to the Claims:

Please cancel Claims 23-42, inclusive, without prejudice and without waiver or disclaimer of any subject matter.

Please add the following claims.

Sub 67  
Claim 43 (new): A method comprising:  
receiving a communication from a sender, the communication  
including an audio message and sender identification  
information;  
storing the audio message;  
searching one or more remote websites for publicly  
accessible correlated information related to the  
sender, using the sender identification information;  
and  
storing the correlated information.

Claim 44 (new): A method as defined in Claim 43,  
further comprising:  
encoding the audio message;  
composing an email message that includes the encoded audio  
message; and  
transmitting the email message to a predetermined email  
address.

Claim 45 (new): A method as defined in Claim 43,  
further comprising:  
constructing a message interface web page; and  
receiving a request for the message interface web page.

Claim 46 (new): A method as defined in Claim 45, wherein the message interface web page is constructed using data derived from the communication.

Claim 47 (new): A method as defined in Claim 46, wherein the data comprises the correlated information.

Claim 48 (new): A method as defined in Claim 46, where the message interface web page comprises a hyperlink that enables a user to request the message interface web page.

G  
FI  
Claim 49 (new): A method as defined in Claim 46, further comprising:  
sending the message interface web page to a remote client.

Claim 50 (new): A method as defined in Claim 46, further comprising:  
sending the message interface web page to a local presentation interface.

Claim 51 (new): An apparatus comprising:  
a telephone mechanism to connect to a network and to receive a communication from a sender, the communication including an audio message and sender identification information;  
memory to store the audio message; and  
a search director to search one or more remote websites, using the sender identification information, for publicly accessible correlated information related to the sender; and  
memory to store the correlated information.

Claim 52 (new): An apparatus as defined in Claim 51,  
further comprising:  
an encoder to encode the audio message;  
a composer to compose an email message that includes the  
encoded audio message; and  
a client to transmit the email message to a predetermined  
email address.

Claim 53 (new): An apparatus as defined in Claim 52,  
further comprising:  
a local presentation interface to display a message  
interface web page.

Claim 54 (new): An apparatus as defined in Claim 52,  
further comprising:  
an audio player.

Claim 55 (new): An article storing instructions that,  
if executed, enable a system to:  
receive a communication from a sender, the communication  
including an audio message and sender identification  
information;  
store the audio message;  
search, using the sender identification information, one or  
more remote websites for publicly accessible  
correlated information related to the sender; and  
store the correlated information.

Claim 56 (new): An article as defined in Claim 55,  
storing instructions, that if executed, enable the system to:  
encode the audio message;

compose an email message that includes the encoded audio message; and  
transmit the email message to a predetermined email address.

Claim 57 (new): An article as defined in Claim 55, storing instructions that, if executed, enable the system to: construct a message interface web page; and receive a request for the message interface web page.

Claim 58 (new): An article as defined in Claim 57, wherein the message interface web page is constructed using data derived from the communication.

Claim 59 (new): An article as defined in Claim 58, wherein the data comprises the correlated information.

Claim 60 (new): An article as defined in Claim 58, wherein the message interface web page comprises a hyperlink that enables a user to make requests for the message interface web page.

Claim 61 (new): An article as defined in Claim 58, storing instructions, that if executed, enable the system to: send the message interface web page to a remote client.

Claim 62 (new): An article as defined in Claim 58, storing instructions, that if executed, enable the system to: send the message interface web page to a local presentation interface.
